DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "said arrays" has no antecedent basis.

In claim 10, "said PC boards" has no antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 7-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Roller.

Roller shows the beacon that includes a generally cylindrical, thermally conductive support 70 as shown in figures 2 and 3; plural LEDs mounted in thermally conductive relationship to the support 70, col. 5, lines 18-43; plural reflectors 71; and a thermally conductive base 30, col. 8, lines 29-29-31 and 58-61, wherein a thermal pathway is provided between first support 30 and second support 70, see cols. 5 and 6.

With respect to claim 2, see cup shaped lens 91 in figure 2. The base 30 is not covered by the lens.

With respect to claims 7-9, the troughs are defined by reflector 71.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3-6 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roller.

With respect to claim 3, the polygonal surface would not involve patentable invention since it is within the capabilities of the skilled artisan to employ desired shapes, see col. 5, lines 39-43.

With respect to claims 4 and 5, the artisan recognizes the thermal qualities of PC board 40 for thermal conduction.

With respect to claim 6, see the trough opening in figure 3

With respect to claim 10, the artisan recognizes the advantages of a metal core PC board when involving thermal conduction.

Allowable Subject Matter

Claims 11-20 are allowed.
